INDUSTRIAL AIR TOOLS

Air inserting tool IP 900

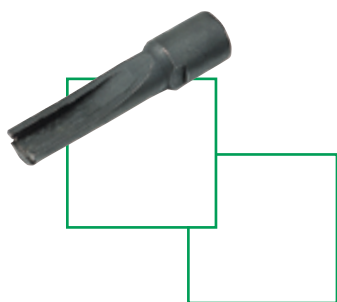

Other technical features

Accessories available upon request

- Bits for male and female insulated or non-insulated electric connectors with a pitch of 6.35 mm.
- On request or according to drawings, special bits can be supplied **for every other type of electric connector**. Specify the pitch and send a sample..

Bits for connectors

Cod. 635856010

Length max 50 mm.
Can be used only for male and female **non-insulated** electric connectors.

Bits for connectors

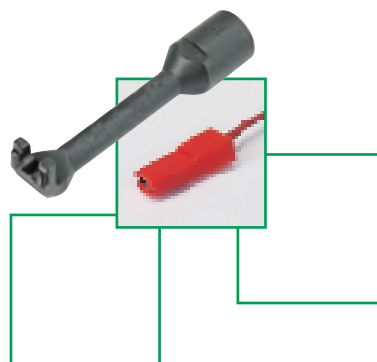

Cod. 635856015

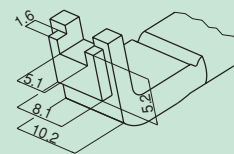

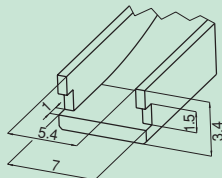

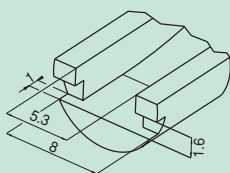

Length max 50 mm.
Can be used only for male and female **insulated** electric connectors.

Bits for connectors

Cod. 635856020

Length max 51 mm.
Can be used for male and female electric connectors, both **insulated and non-insulated**. The special form of the head aids the "guided" insertion of the insulated electric connector.
